

Open Call Statement

OPEN CALL — Trinity | 三位一体

A Space Virtual Gallery invites artists to explore the relationship between environment, humanity, and machine through the structure of **Trinity**.

The exhibition brings together three forces: **Environment, Human, and Machine**. Rather than existing as separate subjects, they form an interconnected system in which each shapes, produces, and transforms the others.

The environment gives form to human life. Humanity extracts, reshapes, and reorganizes its materials to create machines. Machines then return to transform both their creators and the environment from which they originated. This relationship is not linear, but cyclical: environment shapes humanity, humanity creates machinery, and machinery continuously reconstructs the conditions of both human and environmental existence.

This open call seeks works that examine the connections, conflicts, and dependencies within this three-part system. We are interested in creation and destruction, the organic and the artificial, embodiment and invisibility, control and autonomy, extraction and regeneration.

Trinity asks what happens when environment, humanity, and machine can no longer be understood independently. Together, they form a system that continuously creates, consumes, adapts, and transforms itself.

中文

A Space Virtual Gallery 邀请艺术家以“三位一体(**Trinity**)”作为结构, 探索环境、人类与机械之间的关系。

本次展览围绕三种力量展开: 环境、人类与机械。它们并非彼此独立的主题, 而是共同构成一个相互连接的系统, 在其中不断塑造、产生并改变彼此。

环境塑造并孕育人类生命。人类提取、重组并改造环境中的物质, 从中创造出机械。机械随后又反过来改变它的创造者, 以及它最初诞生的环境。这并非一种单向关系, 而是一个持续循环的过程: 环境塑造人类, 人类创造机械, 而机械又不断重构人类与环境的生存条件。

本次公开征集寻找讨论这一三元系统中连接、冲突与依存关系的作品。我们关注创造与毁灭、有机与人工、实体与无形、控制与自主、索取与再生。

“三位一体”试图提出一个问题: 当环境、人类与机械已经无法被彼此独立地理解时, 我们该如何重新认识三者之间的关系? 它们共同构成了一个不断创造、消耗、适应并改造自身的系统。

Time Line

Application deadline: September 30, 2026

Installation: September 30 - October 4

Exhibition dates: October 5 - October 31, 2026

OPEN CALL — GROUP VIRTUAL EXHIBITION

Environment, humanity, and machine are often understood as separate forces, yet each continuously shapes and transforms the others. The environment gives form to human life, humanity reorganizes its materials to create machines, and machines return to alter both their creators and the environment.

“Trinity” invites artists to examine this three-part system. Rather than presenting a linear relationship, the exhibition considers a continuous cycle of creation, consumption, adaptation, and transformation.

This group exhibition brings together artists exploring creation and destruction, the organic and the artificial, embodiment and invisibility, control and autonomy, extraction and regeneration.

We welcome submissions across a wide range of practices including but not limited to 2D work, 3D work, video, animation, and other experimental or digital forms.

 Eligibility: Open to artists working in any form

 Application deadline: September 30, 2026

 Exhibition dates: October 5 - October 31, 2026

 Location: A Space Virtual Gallery (www.aspacevirtualgallery.vercel.app)
